How to Navigate the Chaos of the Day

Future of Travel

Hurricane Season in a COVID-19 Environment

Current Security Environment

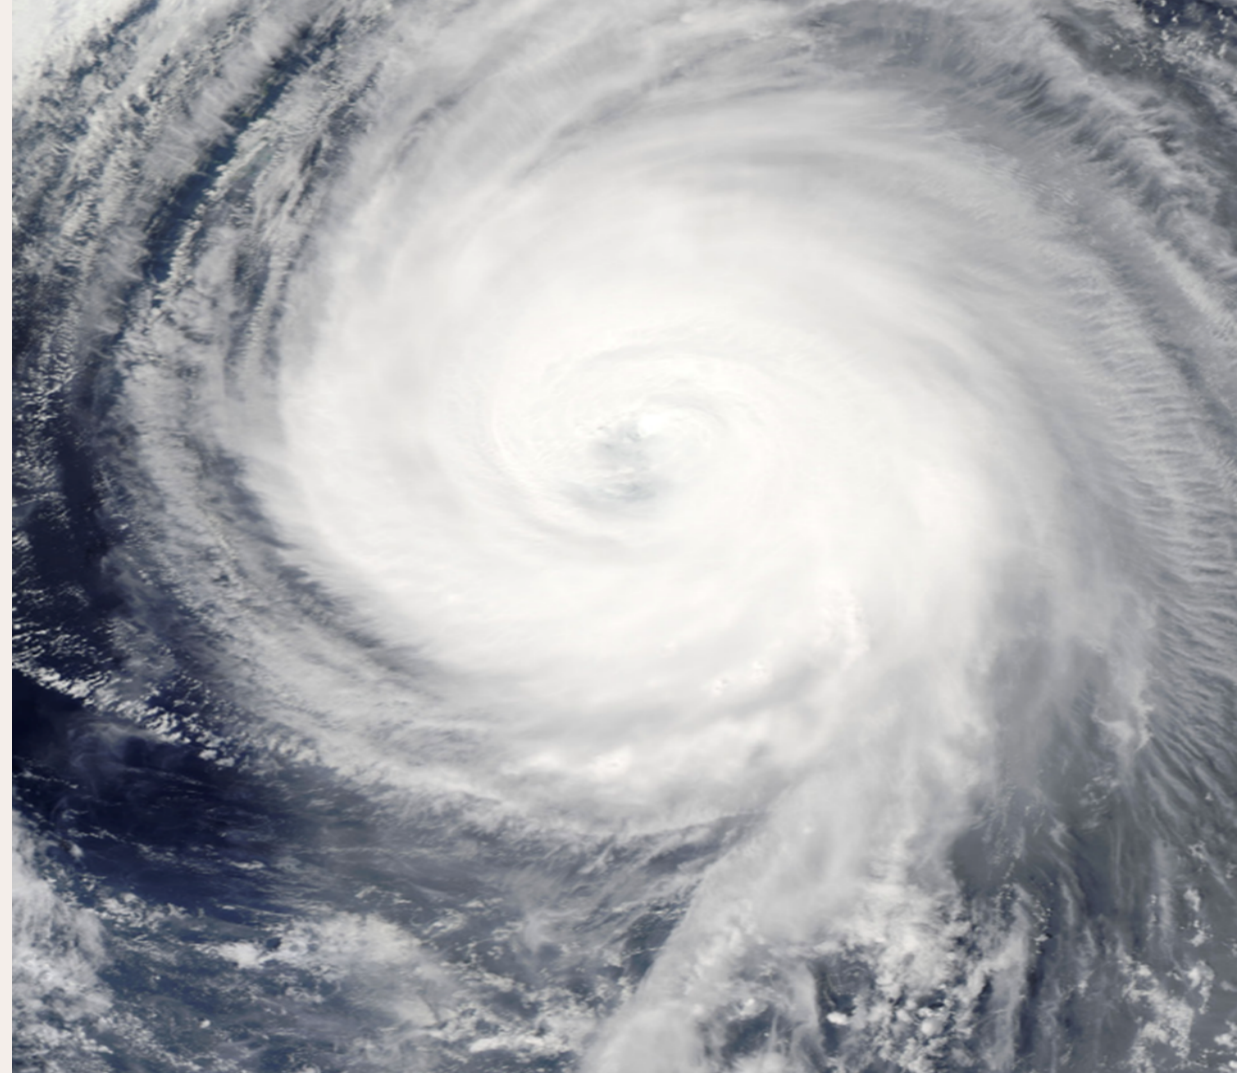

Future of Travel

- We are seeing more countries, especially those in the southern hemisphere, extending their international travel restrictions through August.
- Focus in most countries is on **relaxing internal restrictions first**, control new outbreaks before lifting border control measures.
- Most EU countries' borders closed, likely to be extended through the summer. **International business travel unlikely to pick up until August.**
- Navigating airports and flying will be a different experience:
 - Masks
 - Thermal scans
 - 5-10 minute pre-board testing
 - Parking lot check-in & bag drop
 - Touchless check-in (biometrics)
 - "Immunity passport" – poorer countries
 - Airplanes have high-quality air filtration systems but that will not stop someone coughing onto your space
 - No middle seat, ticket prices go up to compensate
 - COVID-19 arrival testing

Hurricane Season w/ COVID19 Restrictions

- Who is Key and Essential?
- Limited Commercial Transportation
- Response Timing – Airspace & Boarder Closures
- Supply Chain Strained
 - Fuel, Food, Power
- Telecommunication Strained to Non-Existent
- Labor Efficiency
 - Slower Response Times – Slower Recovery
- On-Site Safety & Physical Security
 - Protect your people & assets
- Medical Evacuation

Current Security Situation – What's Next?

- Poor state of the economy
- Ongoing anxiety and uncertainty over the pandemic
- Outrage over police brutality
- Stark partisan divide
- Loss of confidence in the *"social contract"*
- Re-training: generational, who wants to be a police officer?
- *"Desperate people, do desperate things"*
- How do you secure your family & your business?
Privatization?
